

# Privacy Policy

With the simple fact of **using** the bot, you **accept** everything said and agreed this article.

## **\*Message content:**

We need the content of the messages to execute key features of the bot, it is too important that we decided to make the reasons for this known.

**Starboard:** That feature needs the content and attachments of the messages with the star reactions so getting the content is essential, without that that Feature can't work.

**Tickets:** Transcription of tickets are needed to get the messages sent in a ticket channel and re-send it in a .txt file.

**Suggestions:** The need for the content in this module is based on the validation of the elements to prove if that suggestion has already been reviewed by a moderator.

**Commands:** No counting prefixes, some commands need to get the content for their functionality, for example the quote or afk command

We care so much about user privacy, that's why we don't store or share anything outside of Discord at all.

Sincerely  
Tokyo | トキヨ's Group
